

It can't leap tall buildings in a single bound,

but the Casablanca Renommee

IS faster than a speeding bullet.

- Renommee Plus with an Intel Pentium 4 processor (3.8 GHz) & 1024 MB DDR-RAM

The all-new Casablanca Renommee Plus incorporates the latest technological advances to bring you the fastest Casablanca ever.

In terms of rendering and processing speed, the Renommee Plus equals the Solitaire Plus. Each Renommee is shipped with a 300 GB hard-drive in an exchangeable drive sled and with a Dual-Layer Pioneer DVD burner (latest model).

Software is installed from CD/DVD – due to this, the Renommee no longer requires a Smart Media drive. Of course, all required front and back connectors are still there. The HD sled is compatible with the Prestige – you can use your Prestige drive with the same sled in the Renommee. No need to lose your project when upgrading! Casablanca Renommee is shipped with Smart Edit 5.

The Renommee Plus is almost five times faster than a Prestige! This makes Renommee Plus the ideal machine for demanding users. The Renommee Plus' high performance capabilities make it ideal for the demands of HDV editing.

Included Software:

Smart Edit 5, Arabesk 3, Fonts 1-4, Effects 1-4, 3D Shapes & Presentation Options.

- | | |
|-----------------------------------|---|
| - Renommee Plus | Suggested retail: \$3999 |
| - Renommee Plus Loyalty | Suggested retail: \$3200 |
| - Renommee Plus Trade-In A | Suggested retail \$3200
Trade in from Kron Plus or Prestige includes transfer of all software |
| - Renommee Plus Trade-In B | Suggested retail \$3500
Trade in from Classic, Claro, Avio, or Kron includes transfer of all software |

The need for a fast, effective editing system is becoming increasingly important. The Solitaire, with its 3 Ghz processor represents the power horse in the Casablanca family of editors. With SMART EDIT 5 on the horizon bringing the the possibility of HDV projects, that need for speed is becoming even greater.

We are proud offer Solitaire owners a new level of performance to make it possibly the fastest complete editing system ever devised.

The Performance Kit is a mainboard replacement for current Solitaire users, sporting not only a 3.8 GHZ Intel processor but also a considerably more powerful bus system for processing and shifting huge chunks of data with noticeable results. The Solitaire with the Performance Kit is 77% faster than a normal Solitaire when it comes to rendering complex effects like 3D Transitions and complex animations.

Details:

- High quality mainboard with selected Intel Pentium 4 processor at 3.8 GHz
- Fast DDR2 RAM memory banks with 512MB each (= 1024MB total memory)
- Powerful cooling system for longer lifespan of components

Microsoft Windows on a Casablanca

A revolution is coming! Our fastest Casablanca editors (Solitaire/Plus and the Renommee Plus) will no only be the fastest dedicated non-linear digital editor capable of HDV editing but you will be able to switch hard drives (on the removable sled) and run media and productivity applications in the Windows environment! Yes – you can run Smart Sound, Photo Shop or an effects program, even do your email and surf the internet on your fast Casablanca!

We have seen so many customers in recent years need to utilize a PC for functions related to their media work or their office. This new capability allows them to use a very fast PC for all their needs and still stay clean of virus concerns within their video projects. Disk Transfer can be used to share data between Hard Drives.

The Microsoft Windows Kit will be available for: Renommee PLUS, Solitaire and Solitaire PLUS

The Kit will contain the following:

- Renommee or Solitaire hard-drive sled with a 250 GB hard-drive
- Microsoft Windows – preinstalled (information on version etc. will be coming soon)
- Mouse and keyboard

Exact specifications, prices and release dates are coming soon, and are subject to change.
